

BIG seminar

Biology and integrative genetics

**Monday,
March 7
17h**

**Auditorium Bâtiment Biophore
Unil-Sorge at Dorigny**

Forest Rohwer
San Diego State University

“Ecology and the Human Virome“

Viruses are the most abundant biological entities in both the world and your body. Most are phage that kill bacteria and change both the rates at which energy is used, as well as drive diversification. I will discuss general viral ecology principles and how they are important to the human body.

BIG is an initiative of the Faculty of Biology and Medicine, University of Lausanne, and is organized by Uta Paszkowski, Laurent Keller, Henrik Kaessmann and Jan Roelof van der Meer.
