SEMINAR

Mark Lynch

Single-Cell Biology Specialist, Fluidigm

"RNA and DNA Analysis from Single Cells Using the Fluidigm C1"

The seminar will focus on new and already established C1 applications, cell preparation and qualification for C1 use as well as an introduction to the Fluidigm Polaris, an instrument for routine single-cell manipulation studies.

Tuesday, 10th March 2015

09:30

Génopode Building, Auditorium A

Host: Dr Keith Harshman

All the interested people are cordially invited.
