

Biopôle has launched a new initiative that aims at giving postgraduates the opportunity to leverage their scientific skills in the frame of an industrial experience. The goal of this 'Postgraduate Consulting Group' is to provide emerging companies with a third-party evaluation of their scientific foundations to be more convincing to potential investors.

Practically, postgraduates will have the occasion to evaluate and challenge the scientific solidity of technologies developed by selected Biopôle healthcare startups. The consulting projects will be framed by our partner Alcimed, a leading consulting firm with a strong focus on tech-driven industries including Healthcare, based at Biopôle.

Biopôle is looking for talented and motivated postgraduates for such scientific evaluation. The Biopôle company who will take part in this project is maturing several assets (allosteric modulators) in diseases affecting multiple tissues (cardiovascular, skin, tendons, and cartilage)

What it takes:

- Duration: 6-8 weeks training
- Dedicate about 4h per week on the project (on top of their academic and research commitments)
- Attend kick-off, follow-up and wrap-up meetings with Alcimed

What you get:

- A unique opportunity to leverage your scientific skill in an industrial setting
- Get real-world scientific evaluation expertise applicable in different domains (scientific search and evaluation of new opportunity for corporations, investment opportunities for investors, consulting...)
- A unique experience to make a difference on your CV
- A certificate of completion to add to your curriculum

What we look for:

- Postdoc level of education in life sciences
- High capacity to synthesize information, analytical skills, critical mind
- Ability to translate complex data into accessible information
- Communication skills
- Skills in allosteric modulators and neurotransmitters is a plus

How to apply:

- Send your CV with your publications and a motivation letter to [info@biopole.ch](mailto:info@biopole.ch) before the 21.08.2023.
