Program

9:10 *Welcome address*

9:15 **Michel Moser, UniBe**

«Assembly and evaluation of a plant genome using Illumina and PacBio reads»

9:50 **Muriel Gros-Balthazard, UniFr**

«Revisiting the evolutionary history of the date palm using genomic data»

10:30 *coffee break*

11:00 **Torsten Seuberlich, UniBe**

«Identification of a novel astrovirus in cattle with encephalitis by viral metagenomics»

11:35 **Daniel Wüthrich, UniBe**

«From genotype to phenotype in bacteria»

12:15 *Lunch break (StarOmics students can eat with the speakers)*

13:30 **Mariusz Nowacki, UniBe**

«Epigenetic control of genome reduction in ciliates»

14:05 **Gerrit Kuhn, Pacific Biosciences**

“Benefits of SMRT sequencing for analysis of plant and animal genomes”

14:45 *Break*

15:15 **Didier Reinhard or Patrick Favre, UniFr**

«Identification of conserved proteins involved in arbuscular mycorrhizal symbiosis»

15:50 **Jean-Marc Brunner, SICHH (Swiss Integrative Center for Human Health), UniFr**

«The SICHH, a unique competence center at the heart of Switzerland»

16:20 *Farewell*

Registration is free, but to help us organise the event, please register by clicking on the orange link at the top here: <http://www.cuso.ch/activity/?p=1741&id=1672>
