

BIG seminar

2010-2011

Biology and integrative genetics

Every first Monday of the month

17h, Auditorium Biophore Building

Unil-Sorge at Dorigny

6 September 2010

Sven Bergmann, UniL

"Computational analysis of biological systems: From developmental patterning to genome-wide association studies."

4 October 2010

Michael Dickinson, Californian Institute of Technology

"The visual ethology of fruit flies."

1 November 2010

Greg Barsh, Stanford University

"Genetics of color variation: model organisms and model systems in a post-genome world."

6 December 2010

Wolf-Dietrich Hardt, ETH-ZH

"Salmonella diarrhea: triggering disease in order to invade the gut ecosystem?"

10 January 2011

Gisou van der Goot, EPFL

"The different facets of anthrax toxin receptor: genetic disease, infection and normal function."

7 February 2011

Bernard de Massy, Institut de Génétique Humaine, Montpellier

"A key to the genetic map: The PRDM9 Zinc finger array specifies meiotic recombination hotspots in humans and mice."

7 March 2011

Forest Rohwer, San Diego State University

"Virus metagenomics."

4 April 2011

Enrico Coen, The John Innes Centre, Norwich

"From Genes to Shapes."

2 May 2011

Hopi Hoekstra, Harvard University

"From mice to molecules: the genetic basis of adaptive change."

6 June 2011

Olivier Vionnet, ETH-ZH

tba

BIG is an initiative of the Faculty of Biology and Medicine, University of Lausanne, and is organized by Uta Paszkowski, Laurent Keller, Henrik Kaessmann and Jan Roelof van der Meer.
