

Génopode

welcome

CIG SEMINARS PROGRAM SPRING 2010

12:15 – Génopode, Dorigny – Auditorium B

Monday February 22, 2010

Paul Martin,

University Walk, Bristol, UK
«Studies of repair and inflammation in flies and fish and mice»

Host : Walter Wahli

Monday March 8, 2010

Janet Partridge,

St. Jude Children's Research Hospital, Memphis, USA
«Mechanism of assembly of heterochromatin at fission yeast centromeres»

Host : Nouria Hernandez

Monday March 22, 2010

Ian Willis,

Yeshiva University, Einstein Medical School, New York, USA
«Synthetic genetic interactions in lipid droplet biogenesis»

Host : Nouria Hernandez

Monday March 29, 2010

Ewan Birney,

EMBL - European Bioinformatics Institute, Hinxton, UK
«Individual-specific and allele-specific chromatin signatures in diverse human populations»

Host : Ioannis Xenarios

Monday April 19, 2010

Marjori Matzke,

Gregor Mendel Institute of Molecular Plant Biology, Vienna, Austria

«A specialized transcriptional machinery is required for RNA-directed DNA methylation in plants»

Host : Winship Herr

Monday April 26, 2010

Toshio Tsukiyama,

Fred Hutchinson Cancer Research Center, Washington, USA

«In vivo functions of chromatin regulation revealed by new approaches»

Host : Students and Post-docs

TUESDAY May 11, 2010 in **Auditorium A**

Ralph Greenspan,

The Neuroscience Institute, San Diego, USA

«Functional strategies shared by invertebrate and vertebrate nervous systems»

Host : Students and Post-docs

Monday May 17, 2010

Doug Hanahan,

EPFL, Lausanne, Switzerland

«Mechanisms of multi-step tumor development and progression»

Host : Bernard Thorens

Monday May 31, 2010

Richard Benton,

CIG, University of Lausanne, Switzerland

«Olfactory genes, circuits and behaviours»

Host : Bernard Thorens
