

Génopode

welcome

CIG SEMINARS PROGRAM SPRING 2016

12:15 – Génopode, Dorigny – Auditorium B

Monday January 25, 2016

Joan Steitz,

Yale University, USA

«Noncoding RNAs of viral and cellular origin: more surprises»

Host: Nouria Hernandez

CANCELLED

Monday April 18, 2016

Virginie Orgogozo,

Université Paris Diderot, Paris, France

«Phenotypic evolution and genetic tinkering in Drosophila and other organisms»

Host: Richard Benton

Monday February 8, 2016

Steven Brown,

University of Zurich, Switzerland

«Sleep, clocks, and subnuclear dynamics in neurons»

Host: Paul Franken

Monday May 9, 2016

Daniel Durocher,

University of Toronto, Canada

«Understanding and manipulating the response to DNA double-stranded breaks»

Host: Vincent Dion

Monday February 29, 2016

Liliane Michalik,

University of Lausanne, Switzerland

«PPARs and the skin: it's a dangerous world out there»

Host: Alexandre Reymond

Monday May 30, 2016

Peter Stern,

Science Europe Office, Cambridge, UK

«The manuscript selection process at SCIENCE»

Host: Mehdi Tafti

Monday March 21, 2016

Erica Davis,

Duke University, Durham, USA

«Functional dissection of pediatric genetic disease»

Host: Alexandre Reymond

Monday June 13, 2016

Jesper Svejstrup,

Francis Crick Institute, Hertfordshire, UK

«The transcription-related DNA damage response»

Host: Vincent Dion

Monday April 11, 2016

Mitchell A. Lazar,

Perelman School of Medicine at the University of Pennsylvania, USA

«Linking of circadian rhythms and metabolism to the nuclear receptor rev-erb alpha»

Host: David Gatfield
